

To Add a Website to Your iPhone Home Screen

1. Open the **Safari App**

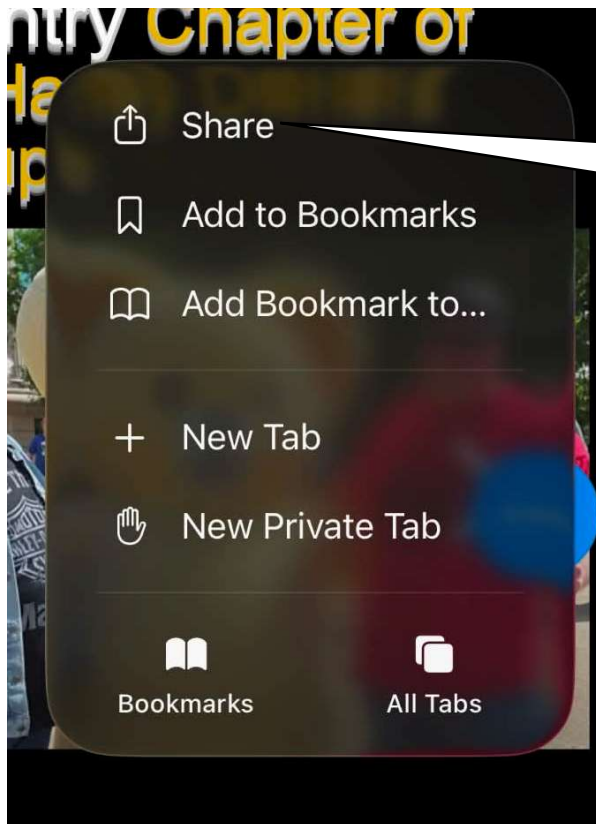

2. Go to the website you want to add to your home screen. This will be **cavecountryhog.org**

Our website should appear on Safari.

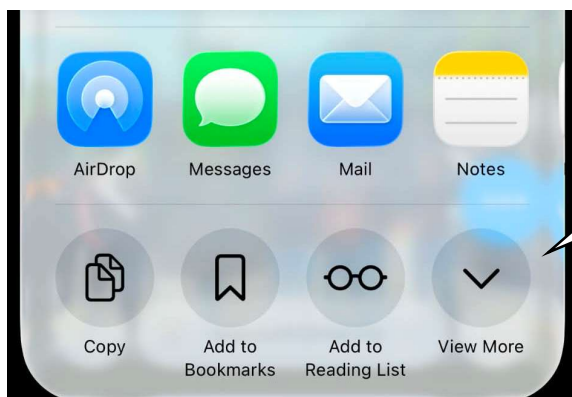

This is the cavecountryhog.org website on Safari.

3. Click on the **3 small dots**. These are menu options.

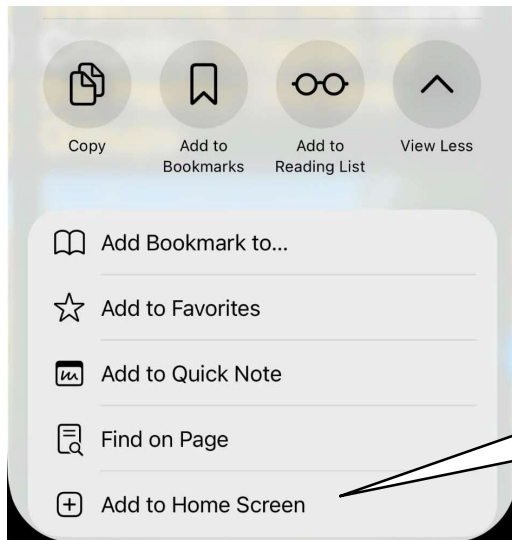

Menu Options should appear.

4. Tap the **Share** button (the square with an arrow pointing up)

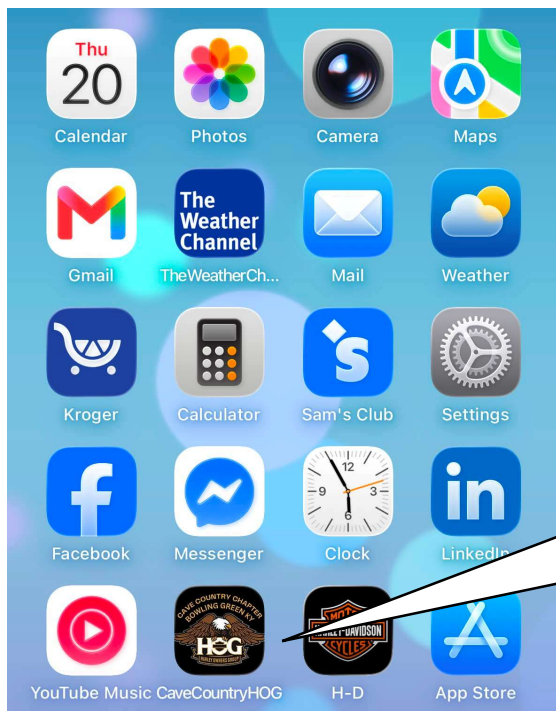

Share Options should appear.

5. You will probably have to tap the **View More** button

6. Scroll down and tap **Add to Home Screen**, and tap **Add**.

The Cave Country HOG website icon should appear somewhere among the icons on your iPhone Home Screen(s).

It may be in a different location than seen here
